

## Do you believe that separate can ever be equal?

Charter schools and vouchers are creating a dual school system in D.C. that has left our traditional neighborhood public schools under-funded, dilapidated and under-enrolled. Yet despite their greater resources and political support, charter schools as a whole have not succeeded in improving public education.

We, the undersigned residents of DC, **demand a moratorium on new charters and expansion campuses until there is equity and accountability between traditional public schools and charter schools.**
